THE WORLD'S FAIR.

There ought to re National pride enough in every American to wish that the World's Fair should be a great success. New York, which might be expected to feel a little sore over the shabby way in which she di-playing only the Pempadour outlines. was treated in the matter of the l'air, is certainly desirous that Chicago acquit itself admirably with the undertaking.

of trouble and dissension among the sole. directors of the Fair are heard. Director-General Davis feels that he has not been properly treated by the local directory. Then there has been a difference of opinion between the National and local Committee on Grounds and Buildings. This is all wrong. The World's Fair is

nothing if not National. Local pride and vanity should not assert itself detriment ally to the undertaking. This is where the danger lies. To Chicago, will be largely due whatever success the Fair may have and the city derives glory enough from the presence of the great show in its midst. A spirit of Western glorification should not insist too much on what appeals to merely local pride.

The time for preparation will be found only too short even if perfect harmony, organized effort and the use of every moment of time contribute to success. But jarring senti ments and force lost on side issues will surely result disastrously. The country has a right to object to this.
